

Unite Medical

— DESIGN SYSTEM · PRECISION

Brand & voice *guidelines.*

The complete visual and verbal identity — logo, color, type, graphic language, and the copy rules the build enforces. Everything on this sheet exists in code; if the sheet and the code disagree, the code is right.

VERSION 1.0 · JUL 7, 2026 · SOURCE OF TRUTH: SRC/TOKENS.JS · LOGO.JSX · PHASE_CHECK.PY

— 01 · THE BRAND IDEA

Precision, not *gloss.*

Unite Medical sells to people who buy for institutions: materials managers, pharmacy buyers, VA contracting officers, EMS chiefs, regional distributors. These buyers are professionally skeptical — they read **precision** as trust and **gloss** as risk. So the brand is built like a technical document, not a landing page:

- Bone paper, green-black ink, one deep surgical-green accent.
- Hairline rules instead of drop shadows.
- A heavy monospace "data layer" — registration numbers, SKUs, HTS codes, lead times — presented as chrome. For this audience the data *is* the decoration.
- **No** decorative gradients, glassmorphism, floating orbs, or shimmer. Those read "AI-generated startup" — the opposite of what a hospital buyer wants to see.

ONE LINE

Institutional procurement reads precision, not gloss.

— 02 · LOGO

The mark and the *lockup.*

Unite Medical

A "UM" monogram — a U ligature joined by an M — drawn in bone strokes (round caps and joins) on a solid surgical-green field with corners rounded to 14% of the mark's size. The flat single-color mark is deliberate: it prints, embroiders, and engraves cleanly. The old orange-to-magenta gradient chip is **retired — never use it.**

The lockup sets the wordmark in Archivo: "Unite" at weight 600 in full ink, "Medical" one weight lighter at 62% opacity. In product code, use the `UMLogo` / `UMLogoMark` components — don't rebuild the lockup by hand.

ASSET	PATH
Master SVG	public/favicon.svg
Favicons (16 / 32 / 96 / 180 / 192 / 512 + .ico)	public/favicon-*.png · public/favicon.ico
Apple touch icon	public/apple-touch-icon.png
Raster source	public/images/source/um-logo-mark.png
Regeneration script	scripts/render_favicons.py

Rules

- Minimum size 16 px for the mark; the lockup needs ≥ 20 px height.
- Clear space: half the mark's height on all sides.
- On dark grounds the mark is unchanged (its field carries the contrast); the wordmark flips to bone.
- Never: recolor the field, add a gradient or shadow, outline, rotate, or place on a photo without a solid backing.

03 · COLOR

One accent does all the *work*.

All colors live in `src/tokens.js` as the `D` object. Legacy key names (`plum` , `terra`) were kept so 49 pages could retheme without a rename sweep — **the key says plum, the value is green**. Always reference tokens; never paste hex into components.

TOKEN	HEX	NAME	ROLE
D.paper	 #f3f2eb	Bone	Primary background
D.paperAlt	 #e9e7dc	Deep bone	Alternating bands, table stripes
D.card	 #fcfbf6	Raised bone	Cards and raised surfaces
D.ink	 #16201a	Green-black	Primary text
D.inkDeep	 #0e1713	Evergreen black	Dark bands, footer, hero plates
D.ink2	 #57635a	Slate green	Secondary text
D.ink3	 #8b968d	Fog green	Tertiary / meta text, table headers
D.line	 #dbd9cc	Hairline	1 px rules and borders
D.plum	 #1d5c4d	Surgical green	The accent: links, eyebrows, emphasis, logo field, primary buttons
D.plumSoft	 #9dbcae	Sage	Accent on dark grounds only
D.terra	 #b3592b	Clay	Signal / warning accent — sparingly (near-expiry, alerts, pending)
D.terraSoft	 #dcc0a8	Soft clay	Muted warning surfaces
D.grad	135° green	—	Functional depth on dark plates only — never decoration

- **One accent.** Surgical green does all the emphasis work. If everything is green, nothing is — keep accent coverage under ~10% of any view.
- Clay means "pay attention": warnings, near-dated stock, pending confirmations. Never decorative.
- Dark sections use evergreen-black grounds with bone text and sage accents.
- Contrast: ink on paper $\approx 13.5:1$, green on paper $\approx 6.9:1$ — both pass WCAG AA. Fog green is for meta text ≥ 11 px only.

04 · TYPOGRAPHY

Three families, three *jobs*.

TOKEN	FAMILY	JOB
D.display	Instrument Serif	Headlines and display only. Weight 400 always — size does the work, not weight. Tight letter-spacing (–1 px and beyond at large sizes).
D.sans	Archivo	Everything readable: body, UI, buttons, forms. 400 body / 600 emphasis and buttons.
D.mono	IBM Plex Mono	The data layer: SKUs, registration numbers, prices, table headers, eyebrows, timestamps. Uppercase + 1–2 px letter-spacing for labels.

Loaded from Google Fonts: Instrument Serif (400 + italic) · Archivo (400–700 variable + italic) · IBM Plex Mono (400, 500). Headline scale is fluid — `clamp(34px, 5.6vw, 56px)` for page titles, up to 60 px for heroes, line-height ≈ 1.02 .

Signature moves

- **Italic serif emphasis** — emphasis inside a headline is italic Instrument Serif in surgical green (the **Grad** component): quiet, editorial, print-like. It replaced the old gradient-shimmer text, which is banned.
- **The eyebrow** — sections open with a short 28 px rule + mono caps label in green (the **Eyebrow** component), like a figure label in a technical document. Realtime contexts may swap the rule for a pulsing dot.
- **Data as chrome** — the nav utility strip sets FDA, MSPV BPA, and CAGE numbers in 10.5 px mono. Credentials are part of the interface, not buried in a footer.

05 · GRAPHIC LANGUAGE

Hairlines, plates, and *grids*.

- **Hairlines, not shadows.** Structure comes from 1 px rules. Border radii are 0–4 px on structural elements (sharp = institutional); 12 px only on large cards.
- **Photography is documentary:** real warehouse, real product, natural light — framed by a hairline with a mono data strip beneath, like a plate in a report. No stock-photo handshakes, no lens flares.
- **Tables and grids everywhere.** Mono uppercase column headers in fog green on deep-bone strips. Data is a first-class visual citizen.
- **Motion is minimal:** fade-ups on scroll, a 2.6 s pulse for live indicators. Nothing loops for decoration.
- **Banned outright:** glassmorphism, decorative gradients, orbs/blobs, shimmer, emoji in UI copy, drop shadows as decoration.

06 · VOICE

Write like a *counterparty*.

- 1. **Precise beats impressive.** "Ships same-day on orders before 2pm EST" — never "lightning-fast shipping."
- 2. **Honest to a fault.** No fake team pages, invented headcount, inflated SKU counts, or phantom warehouses. Where we're small, we say so plainly — the Blog is empty rather than filled with filler; Careers is an honest contact page.
- 3. **Talk like a counterparty, not a vendor.** The reader manages procurement for a living. Skip the wind-up; lead with the term sheet: price, lead time, compliance status, minimums.
- 4. **The data carries the emotion.** A real FDA registration number is more persuasive than any adjective.
- 5. **Lowercase confidence.** Understatement over exclamation. One exclamation point per site, ideally zero.

Style mechanics

- Sentence case for headlines and buttons ("Source & quote"). ALL-CAPS is reserved for the mono data layer.
- Numerals over words for anything a buyer might compare: "500M+ units", "before 2pm EST".
- Em dashes and middots are house punctuation for data strings: FDA 3015727296 · CAGE 8MK70.
- Times are EST. Dates are unambiguous (Jul 7, 2026). "Distributors," never "dealers."

Voice by context

CONTEXT	REGISTER
Marketing pages	Editorial and spare. Serif headline, one italic-green emphasis, short declarative subhead — then let the data grid talk.
Product / quote / portal UI	Terse and mono-forward. Labels over sentences: "HTS PENDING · CONFIRM AT DESK" beats a paragraph.
Vendor-facing (manufacturers)	Plain instructional English, short sentences, no idioms — most readers are ESL. Say exactly what to put in each field and what happens next.
Government / compliance	Formal, citation-heavy, zero superlatives. Contract numbers up front.
Errors & empty states	Honest and useful. Say what happened and the one next action. Never chirpy ("Oops!").

— 07 · HARD COPY RULES · MACHINE-ENFORCED

The build fails if copy says *this*.

`scripts/phase_check.py` scans all customer-facing copy on every build.

NEVER SAY	BECAUSE / SAY INSTEAD
BPA 36F79725D0203	Retired. MSPV BPA 36C24123A0077 (confirmed by Damon, Jun 29, 2026)
VOSB / SDVOSB as a self-claim	Unite doesn't hold these. Only "via authorized SDVOSB partner" (external attribution) is allowed
"48-hour shipping" · "4 DCs" · "3 coasts" · Reno / Dallas warehouses · "12,400 SKUs"	Fiction. One warehouse — Lithia Springs, GA : "same-day on orders before 2pm EST to all 50 states"
Flexport · ShipStation · QuickBooks/QBO · Cin7 · PunchOut/cXML/OCI	Vendor internals never appear in customer-facing copy — describe the capability, not the tool

NEVER SAY	BECAUSE / SAY INSTEAD
"22 years" · "U.S. Army" · "Army logistics officer"	Unverified founder-bio claims
"EST. 2018"	Wrong founding year
Any @unitemedical.com address	Domain is @unitemedical.net
"HCPC"	It's HCPCS
"Big 3" digs	We don't punch at competitors by name

08 · CANONICAL FACTS

The only approved *versions*.

FACT	VALUE
Legal name	Unite Medical Supply
Address	1487 Trae Lane, Lithia Springs, GA 30122
Phone	833.868.6483 (accounting / billing: ext. 3)
Email domain	@unitemedical.net (support@, accounting@)
FDA establishment registration	3015727296
MSPV BPA	36C24123A0077 (label it "MSPV BPA")
CAGE	8MK70
DUNS	117553945
Footprint	One warehouse: Lithia Springs, GA — ships to all 50 states + territories
Shipping claim	Same-day on orders placed before 2pm EST, Mon–Fri
Scale claim	500M+ units distributed
Ownership claim	Veteran-owned (no VOSB / SDVOSB certification claims)
